WHAT IS CERAMIC COATING?

Ceramic coating is a high-performance, long-lasting protective coating that provides superior protection against scratches, UV rays, and other environmental contaminants. It creates a glossy, hydrophobic surface that repels water and makes your car or other surfaces look and feel brand new.

PREMIUM CERAMIC BUNDLE

STARTING AT \$3000
CONDITION AND SIZE DEPENDING

Ceramic coating can be applied to both the interior and exterior of your car for comprehensive protection. On the exterior, it creates a hydrophobic layer on glass surfaces that repels water, dirt, and improves visibility. This coating can be applied to all exterior glass, including the moonroof and mirrors.

For the interior, ceramic coating can protect leather, dashboards, and consoles from UV rays, stains, and make cleaning easier. Some detail packages may also include a full interior detail, which involves cleaning and conditioning all interior surfaces.

This package includes a follow-up wash session within a week, conducted one-on-one to teach you proper car washing techniques. This hands-on lesson will ensure you can maintain your car's shine and avoid any damage.

MULTI YEAR CERAMIC COATING
